

System Center 2012 Data Protection Manager Accelerator Program

System Center 2012 Data Protection Manager

Delivering enterprise-class data protection and scalability, Data Protection Manager 2010 provides unified data protection for Windows servers such as SQL Server, Exchange, SharePoint, Virtualization and file servers, in addition to Windows desktops and laptops.

Solution Benefits – Why WME

We'll help you get Data Protection Manager up and running in as short a time as possible while taking advantage of the best features that this product offers. By the completion of our engagement, you'll have a functional DPM 2010 deployment capable of backing up any of the Microsoft workloads that DPM supports. Your team's learning curve will be dramatically reduced and you'll be confident with your backup and disaster recovery solution. If you haven't purchased licenses yet, we'll provide trial licenses for Data Protection Manager so you can get started without any upfront licensing costs.

Methodology and Deliverables

We use a structured delivery framework to enhance your understanding of Data Protection Manager's capabilities and ensure a successful engagement.

Deliverables included in this offering are as follows:

- Pre-engagement Interview and Questionnaire
- Pre-installation Requirements Checklist to be completed by your staff or with assistance from WME.
- Data Protection Manager Deployment includes installation of DPM Server (physical or virtual), setup of DPM disk storage pool, deployment of agents for up to 20 servers.

System Center 2012 Data Protection Manager Accelerator Program

- Setup of Protection Groups for Bare Metal Recovery, Hyper-V, Exchange Server, SQL Server, SharePoint, Active Directory, and File Shares.
- Post-Installation Feature Check to verify operation of standard features including backup and recovery tests for the workloads identified above.
- Training Boot Camp with exercises covering all standard features conducted on your new Data Protection Manager installation.

Add On Services

- Multi-site Deployment
- Custom Scripting
- i365 EVault for DPM Appliance
- DPM SCOM Management Pack
- SAN Hardware Snapshots
