

## System Center 2012 Orchestrator Accelerator Program

### System Center 2012 Orchestrator

System Center 2012 Orchestrator, formally Opalis is a workflow management solution for the data center. Orchestrator lets you automate the creation, monitoring, and deployment of resources in your environment. With the help of WME, you can automate a lot of manual tasks into one continuous work stream from disparate systems.

### Solution Benefits – Why WME

Avoid the hassles, complexity, and risk of going it alone on your first Orchestrator deployment. Working side-by-side with experienced System Center engineers, your team will learn best practices and optimal deployment configuration. You'll also save on training costs since our Jumpstart is fixed price and not priced per attendee. If you haven't purchased licenses yet, we'll provide trial licenses for all products so you can get started without any upfront licensing costs

### Methodology and Deliverables

We use a structured delivery framework to enhance your understanding of Service Manager and ensure a successful engagement. Deliverables included in this offering are as follows:

- Pre-engagement Interview and Questionnaire
- Pre-installation Requirements Checklist to be completed by your staff or with assistance from WME
- 2 Server Install, Management Sever, Runbook Server, Orchestrator Web Service and Runbook Designer

### Add On Services

- Custom Workflows
- Custom Scripting
- Third Party Product Integration
- Monitoring with SCOM
