

System Center 2012 Virtual Machine Manager Accelerator Program

System Center 2012 Virtual Machine Manager

System Center Virtual Machine Manager 2008 provides a management solution for today's virtualized data center, affording centralized management of the IT infrastructure, increased server utilization capability, and dynamic resource optimization across multiple virtualization and physical platforms

Solution Benefits - Why WME

Avoid the hassles, complexity, and risk of going it alone on your first Hyper-V deployment. Working side-by-side with experienced System Center engineers, your team will learn best practices and optimal deployment configuration. You'll also save on training costs since our Jumpstart is fixed price and not priced per attendee. If you haven't purchased licenses yet, we'll provide trial licenses for all products so you can get started without any upfront licensing costs

Methodology and Deliverables

We use a structured delivery framework to enhance your understanding of Virtual Machine Manager and Hyper-V and ensure a successful engagement. Deliverables included in this offering are as follows:

- Pre-engagement Interview and Questionnaire
- Pre-installation Requirements Checklist to be completed by your staff or with assistance from WME.
- 4-node Hyper-V Cluster Configuration with storage and network configuration to support live-state migration.

System Center 2012 Virtual Machine Manager Accelerator Program

- Virtual Machine Manager 2008 R2 Deployment with setup of template library and templates for virtual machine provisioning.
- Virsto VDI or VSI virtual storage solution (free 30-day trial) for true thin provisioning of virtual machines and optimized IO performance.
- Post-Installation Feature Check to verify operation of standard features including live-state migration and failover scenarios.
- Expert Training with exercises covering all standard features conducted on your new Hyper-V cluster.

Add On Services

- Multiple Hyper-V Clusters
- VMM Self-Service Portal 2.0
- Hyper-V Backup and Recovery
- Custom Scripting
- Hyper-V Monitoring with SCOM
