

WME Deployment Accelerator Program

Window 7 and 8 Deployment Accelerator Program

Ensuring every desktop, laptop, and user in your organization has every critical Windows update and every latest software version has often been the least glamorous part of being an IT professional, if not the outright "curse."

Hundreds or thousands of hours spent on updates and deployments can feel like the equivalent of "death by 1,000 cuts," and can mean there's little or no time for the projects that can really drive business systems improvements

Pass this task to the Microsoft professionals at WME who will quickly deliver an automated Windows deployment platform that will dramatically change how you manage desktops, laptops, and any and all devices on which Windows software and solutions are installed.

Increased Automation Reduces Cost

Heavy-Touch Manual Processes	Light-Touch Semi-Automated Processes	Zero-Touch Automated Processes
<ul style="list-style-type: none"> • Repetitive manual processes result in high labor costs and inconsistent results • Basic infrastructure and limited compatibility inventory • Limited best practices - steep deployment learning curves 	<ul style="list-style-type: none"> • Semi-automated processes deliver lower TCA and support costs, and ongoing TCO savings • Standardized infrastructure and central HW/SW inventory for more predictable and reliable deployments • Best practices and end-to-end prescriptive guidance enable "light-touch" deployments 	<ul style="list-style-type: none"> • Automated processes deliver lowest TCA and IT labor costs and highest long term TCO savings • Rationalized infrastructure and dynamic inventory allows IT to align with business needs • Best practices and lifecycle management guidance enable 'zero touch' deployment, even in remote locations
Cost: > \$500/PC*	Cost: ~ \$350/PC*	Cost: < \$100/PC*
* Based on Microsoft desktop deployment surveys		

Desktop Deployment Planning Service

Our Approach

- Perform Infrastructure Design and Readiness
- Assess existing systems management solution health

WME Deployment Accelerator Program

- Review Windows 7 and 8 image requirements
- Implement Windows 7 and 8 task sequence logic and scripts
- Deploy Windows 7 and 8 task sequence to environment

Why WME

WME has deep experience in automating Windows deployments (having deployed more than half a million desktops), and can architect a platform that conforms to your exact business needs, from the most high-level, such as enterprise-wide security, to the most granular, such as the integrity of an individual user's data files.

Most importantly, WME can deliver a solution to you "while you sleep," updating 1000 or more desktops overnight, and reloading the data and software on an entire PC in less than 30 minutes. As a certified Gold Partner of Microsoft, WME brings exact expertise to bear on every Windows-related project, ensuring every machine is secure, up-to-date, and running at top speed.

The end result is consistency, speed, and efficiency in deploying Windows across the enterprise, centralized management, easier collaboration across all users—laptops and desktops, in-house and off-site— and a new and enjoyable amount of bandwidth for you and your team.
