

GDPR Compliance Assessment

Make Sure You Are Ready!

The General Data Protection Regulation (**GDPR**) Compliance Assessment is a high impact service provided by Windows Management Experts, Inc. that examines your existing architecture, performs an in-depth analysis and provides actionable recommendations for ongoing GDPR compliance. The GDPR standard is an EU cybersecurity mandate set to take effect on **May 25th, 2018**.

GDPR is Setting a New Standard

Protecting personal data is at the center of the GDPR initiative. **Personal data is defined very broadly under the GDPR.** In fact, *any* data that relates to *any* EU resident, be they personally identified or identifiable, would be considered "personal data" under GDPR.

1. DISCOVERY

Windows Management Experts will perform file-level security and risk assessments, locate relevant personal data, and develop a plan to achieve and maintain compliance. This may include such things as database record sampling, reviewing embedded file metadata, or video archived CCTV video.

2. MANAGEMENT

Work with your team to develop, implement, and manage scalable compliance plans by recommending appropriate policies for design, configuration, and monitoring for your data and applications.

3. PROTECTION

Monitor, analyze and act on threat intelligence gathered and user behavior observed during the Discovery and Management phases. Then, use this information to help effectively address vulnerabilities and breaches.

4. REPORTING

Windows Management Experts can offer administrative services to help your organization meet the ongoing requirements and obligations under the GDPR and offer assistance as needed so you can respond expediently to data requests.

Why WME?

- 30 Years combined experience! We are a leader with hundreds of production implementations under our belt. We know how to get the job done!
