

## IT Security Services

### Get Actionable Intelligence

Cybersecurity failures can threaten your profitability, your integrity, and your brand - not to mention incite detrimental penalties or fines from regulatory agencies. It's important to know where the weak spots are before someone else does!

### Are You a Target? Are You Sure?

Windows Management Experts can perform a spectrum of penetration tests that will quantify risks across your entire cyber-profile, from users to servers to Dark Net targeting. After our analysis we can deliver a Threat Matrix to your *SecOps* team that they can actually use. WME works across the board with financial services, education, healthcare, government, technology and other industries.

### Inclusive Security Evaluation for Today's Threats

- **Hardware Hardening:**  
Evaluate your systems for protection against global vulnerabilities like *Meltdown & Spectre*.
- **Dark Net Chatter:**  
We can peer into underground gathering places like *Tor* and *I2P* for signs that you may be a target.
- **Social Engineering:**  
Perform user threat awareness evaluations using approved methods.
- **End-Point Security:**  
Examine your end-point security methods and settings.
- **User Document Scan:**  
Scan contents for privileged users for signs of non-compliant credential storage.
- **Workstation Setups:**  
Confirm Windows and Mac workstations are properly hardened against direct attack.
- **Parsed Server Logs:**  
Analyze Windows Event Logs and Linux Syslog output for suspicious activity.

### Why WME?

- 30 Years combined experience! We are a leader with hundreds of production implementations under our belt. We know how to get the job done!
- Plugged in to the System Center community, including the product team, partners, and practitioners.
- Senior level technical expertise to ensure proper configuration and integration across the System Center Suite.
- Unique methodologies developed in over 10 years of IT Service Management tooling work.
- Network of MVP partners that can "go deep" where you need it.
- SBE Business Certified - Self Certified by the Small Business Administration (SBA)
- Established in February 2008
- Privately held. Entirely debt-free corporation
- Microsoft Certified Partner with Gold Competency in Cloud Platform, Cloud Productivity, Datacenter and Windows & Devices
- Member of the System Center Alliance program
- Exhibitor at the Microsoft Management Summit 2011
- Speakers at multiple user groups
